

Vaccine Storage Unit Temperature Log Month/Year_____ Storage Unit_____ Provider _____ VFC#_____

- 1) Check storage unit temperature twice a day. Record the temperature by putting an X in the corresponding box and filling in all required information in the column for that day.
- 2) If using a Data Logger, check that the LED light is green. Put an X in the “LED Green” box for the corresponding day and time.
- 3) If temperatures are in the shaded zone or the Data Logger LED light is red, DO NOT USE or DISCARD the vaccine. Obtain a Vaccine Incident Report (www.immunization.mt.gov under “VFC” link) and follow the instructions on the top of page 1. Call the Montana Immunization Program at 444-5580. **VFC temperature logs must be saved for three years.**
